SERVICES FOR YOUR CLIENTS

# Websites, automation and AI to round out your marketing

You take care of strategy and content. I handle the technical side.

I'm **Rosalía Contreras**. I have over 20 years of experience across business and technology, and I now help small companies save time with websites connected to their tools, automations and AI agents. If any of your clients need something like this, I can take care of it: working directly with your client or behind the scenes, under your brand, whichever you prefer.

## WHAT I CAN DO

### Websites and landing pages

Mobile-friendly, fast-loading and with the form connected to email, Google Sheets or the CRM.

**Landing page: 7 to 10 days · business website: 15 to 20**

### Leads that arrive on their own

Every lead from a form, an ad or an email is saved to the sheet or the CRM and the team is notified, with no copying by hand.

**Ideal for lead generation campaigns**

### AI agents

They read incoming emails or forms, sort them against set criteria and put the most important ones at the top.

**For orders, sales leads or job applications**

### Automated market reports

Industry and competitor news summarised in your inbox, with a suggested LinkedIn post.

**Content ideas for your clients**

### Document data to Excel

Invoices, orders or lists in PDF turned into ready-to-use Excel files in minutes.

**No more copying data by hand**

### Process review

Before automating, I look at how the work is done and what goes wrong, so we never automate a process that does not work.

**Ranked improvement proposals**

## REAL CASES

**Radar: market intelligence in your inbox**
In use since May 2026 at a bathroom and ceramics distributor. The client chooses the sources, how often it runs and who receives it.

**An agent that reads email and ranks it with AI**
It runs on its own and I use it every day in my own work.

**PDF to Excel data extractor**
A tool in production, custom-built for one client.

## HOW I WORK

- A 30-minute call to understand what is needed.
- A clear proposal with scope, timeline and a fixed price.
- I use the tools the client already has.
- Everything stays in their name: websites, accounts and access.
- I explain everything without jargon and leave a simple guide.
- Confidentiality: I spent 17 years in a regulated industry.
