ROSALÍA CONTRERAS MOREIRA

Project Management | Operations Coordination | Process Improvement

I coordinate teams and processes, identify friction points and design improvements that I communicate clearly.

Madrid · info@rosaliacontrerasmoreira.com · rosaliacontrerasmoreira.com · English C1 · Portuguese C1

PROFESSIONAL PROFILE

Professional with a track record in project management, team coordination and process improvement, combining analytical skills, structured diagnostic methodology and attention to detail. I identify how work flows across departments, prioritise improvement initiatives, and support both day-to-day coordination and administrative tasks as well as broader transformation projects. Master's in Project Management (IEBS, Oct 2025-Sep 2026).

FEATURED PROJECT

Consultant · Process Diagnosis and Transformation

2026 - Present

B2B/B2C Distribution Company · Construction Materials and Ceramics

- Organisational diagnosis across 4 areas (store, warehouse, logistics, call centre); 9 warehouses between Madrid and Galicia.
- Identification of five communication gaps between Purchasing, Logistics, Administration and the sales network.
- High reliance on tacit knowledge and lack of documented protocols in critical processes.
- Proposal of prioritised improvements: SAP visibility, role definition, workflows.
- Methodology: direct observation, interviews with area managers, process analysis and friction-point mapping.

AI AND AUTOMATION PROJECTS

- Gemini: development of presentation materials for consulting projects.
- NotebookLM: transcription and synthesis of stakeholder meetings (Zoom · Teams), turning scattered notes into structured documentation.
- Claude · ChatGPT: support in writing, information analysis and structuring deliverables.
- n8n: automations for information search, processing and structuring.

PROFESSIONAL EXPERIENCE

ALTEN · Data & Cloud Engineer

Apr 2025 - Jan 2026

- Analysis and documentation of processes in technology transformation environments.
- Coordination with technical teams and client follow-up on data and cloud projects.

Havas Media · Data Engineering

Mar 2023 - Dec 2024

- Technical coordination in the restructuring of digital services on GCP.
- Management of critical dependencies and risks during the migration.
- Weekly client follow-up: planning and expectation management.
- Functional and technical documentation in Confluence.

Excibit · Data Engineering

Oct 2022 - Mar 2023

- Enel project: technical coordination for scalable architecture, Data Lake and DWH
- Requirements definition with stakeholders and design of batch/streaming pipelines.
- Air Nostrum project: coordination of predictive models and integration of external data.

Barrabés.biz · Data & Innovation Consulting

Feb 2021 - Jul 2022

- Innovation projects: multi-source pipelines (CORDIS, EPO, WIPO, Crunchbase).
- Automation of large-scale data acquisition processes.

ETS Asset Management Factory

2002 - 2019

- 17 years in a regulated financial environment: automation, cross-functional coordination and governance.
- Led automation initiatives with compliance, audit and senior management.
